

## PRECAUTIONS:

Avoid contact with eyes and skin. Avoid breathing vapors or mists. Do not ingest. Risk of contact: wear approved safety goggles, suitable protective clothing and rubber gloves. Keep container tightly closed and store in a cool dry and well-ventilated place.

## FIRST AID:

**EYES:** Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Call physician if irritation persists.

**SKIN:** Wash off immediately with plenty of water for at least 15 minutes. If skin irritation persists, call a physician. Take off contaminated clothing. Wash contaminated clothing before reuse.

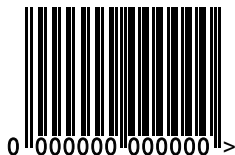

**INHALATION:** Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call a physician if you feel unwell.

**INGESTION:** Drink 2 - 3 large glasses of water. Do not induce vomiting. Call a physician. Never give anything by mouth to an unconscious person.

## KEEP OUT OF REACH OF CHILDREN

Consult material safety data sheet before using. For commercial, industrial and institutional use only.

# DURASHINE

## HIGH SOLIDS METAL INTERLOCK FINISH

## The Durashine Difference

**Durashine** is specifically formulated to counter the high labor costs associated with hard floor care. **Durashine** is non-yellowing and non-powdering, which extends your strip cycles and saves many labor hours. **Durashine** is extremely durable... it resists scuff marks and looks great month after month, even with extremely heavy traffic.

**Durashine** may be applied to virtually all hard floor surfaces to provide beauty and protection beyond your expectations.

**Durashine's** exceptional depth of gloss brings out the hidden beauty of your floors with a "wet look" shine and its slip-resistant surface promotes safety. See for yourself why supermarkets, retail stores, hospitals, schools & building service contractors all call **Durashine** the "best floor finish in the world."

## Directions for Use

### Floor Preparation:

1. Strip floor thoroughly using the appropriate floor stripper.
2. Rinse floor with clear water, changing rinse water frequently to prevent redepositing of dirt and stripper residue.
3. Neutralize floor with neutralizing solution to bring pH of floor back down to 7. This ensures proper finish adherence.
4. Allow floor to dry thoroughly before applying **Durashine**.

### Application:

1. Use a clean finish mop and clean bucket.
2. Saturate mop with **Durashine**.
3. Press mop into wringer to remove excess finish. Do not wring mop.
4. Apply **Durashine** to floor in a figure 8 motion. Best results will be achieved by applying multiple thin even coats vs. thicker coats. Apply a minimum of 4 coats.
5. Allow each coat to dry 30 - 45 minutes depending on room conditions.

### Maintenance:

1. Dust mop floor.
2. Damp mop or auto scrub as required using PH 7, Synthetic Lemon, or Low Foam 7 Neutral Floor Cleaners.
