## FEATURES

A concentrated liquid pressure wash detergent designed to be used in power washers with hot or cold water. It combines the cleaning properties of powders with the convenience of a liquid cleaner. It contains solvents and emulsifiers for degreasing and loosening of heavy soil deposits and detergents to remove all dirt and road film leaving a clean surface.

## DIRECTIONS

For cleaning of most surfaces with pressure wash equipment, dilute 1:40 to 1:80 with water. Best results are obtained by using hot water. Wet the surface to be cleaned with water. Clean each section thoroughly and rinse with cold water. Allow to drain.

Do not allow wash solution to dry on surfaces before rinsing. Avoid prolonged contact with aluminum surfaces.

**NOTE:** When used in food plants, all food contacted surfaces should be rinsed thoroughly with potable water.
